Study of some aspects of adolescent pregnancy at Dankotuwa Medical Officer of health area

MSc.(Community Medicine) - 2002

D 1070

Adolescent pregnancy affects the socio-economic status of the family the pregnancy wastage and the pesentage of chilren with low birth weight were high among adollescent mothers.age appropriate weights of the children were below 3rd centile in more adolescent mothers than the non-adolescent mothers.So immediate measures shold be taken to delay the pregenecy among adolescents.
