

**Creating Interactive learning
content using**

H5P

Dr. Enosha Hettiarachchi
University of Colombo School of Computing (UCSC)

H5P

is a plugin to create interactive content like
Interactive Videos, Presentations, Games,
Quizzes and more!

H5P

01 Create, share and reuse HTML5 content and applications.

Everyone can create rich and interactive web experiences more efficiently - all you need is a web browser and a web site with an H5P plugin.

02 Mobile friendly content

Content is responsive and mobile friendly, which means that users will experience the same rich, interactive content on computers, smartphones and tablets alike.

03 Share rich content

Authors may create and edit interactive videos, presentations, quizzes, games, advertisements and more. Content may be imported and exported.

04 Free to use

A completely free and open technology.

Intended Learning Outcomes

After completion of this workshop, participants will be able to:

- Identify different H5P content types that can be used for their courses.
- Create rich and interactive learning contents and quizzes for online/blended courses.

Content Types

Content Types

Create a task with missing words in a text

Fill in the Blanks

Create text-based drag and drop tasks

Drag the Words

Multiple Choice

Create flexible multiple-choice questions

Drag and Drop

Create drag and drop tasks with images
