Vidangadi churna is a herbal formulae for treating intestinal worms and related digestive disorders. *Krimiroga* is a condition in Ayurveda that refers to parasitic infestations in the body, particularly in the digestive system. *Agnimandya* is the condition where this digestive fire is weakened or imbalanced, leading to improper digestion. The main purpose of study, is to find out the mode of action of *Vidangadi churna* on the pathogenesis of *Krimiroga* and *Agnimandya* by studying the pharmacokinetics and pharmacodynamic potentials of ingredients. It has five ingredients which are *Vidanga* (*Embelia ribes*), *Haritaki* (*Terminalia chebula*), *Kampilla* (*Mallotus philippensis*), *Yawakshara*, and *Saindhawalavana* (rock salt). The data has been collected by authentic texts, monographs, dictionaries, research articles etc. According to the results in related to *Rasa panchaka*, prominent *Rasa*, *Guna*, *Virya*, *Vipaka*, *Dosha karma* were *Katu*, *Laghu*, *Ushna*, *Katu* and prominent *Doshakarma* (pharmacological action) was *Kapha-vatashamaka*. Hence, it can be said stated *Vidangadi churna* is a classical formulation used in for treating *Krimi*, due to anthelmintic properties. *Agnimandya* include, Weak digestive fire, *Ama* formation, Loss of appetite, Indigestion, Flatulence and belching and constipation or diarrhoea. Anthelmintic substances are those that expel or destroy intestinal parasites or worms which properties include antimicrobial action, digestive stimulation, detoxification and laxative action. *Vidangadi churna* acts comprehensively in managing *Krimiroga* by *Krimighna* action, balancing *Agni* and digesting *Ama* to disrupt the pathogenesis.

Keywords: Ayurveda, *Vidangadi churna*, *Krimiroga*, *Agnimandya*
